

Job Portal System (Indeed-like) – Production Level Project Scope (PHP + MySQL)

Technology Stack

Backend

- PHP 8+
- Core PHP (MVC Architecture)

Database

- MySQL

Frontend

- HTML5
- CSS3
- Bootstrap 5
- JavaScript
- jQuery

Authentication

- PHP Sessions
- Remember Me Cookies

File Upload

- PHP File Upload

Validation

- Server-side Validation
- JavaScript Validation

Security

- Password Hashing (password_hash)
- CSRF Protection
- XSS Protection
- SQL Injection Prevention (PDO Prepared Statements)

- Rate Limiting
- Secure Session Management

Logging

- Custom Error Logs

Deployment

- Apache / Nginx
 - Linux Server
-

Project Overview

A complete Job Portal system similar to Indeed where:

- Employers post jobs.
 - Candidates search and apply for jobs.
 - Admin manages the platform.
 - Resume upload and application tracking.
 - Production-level security and architecture.
-

User Roles

1. Admin

Manage platform and monitor activities.

2. Employer

Post jobs and manage applicants.

3. Candidate

Search and apply for jobs.

Module 1: Authentication & Authorization

Registration

Candidate Registration

Fields

- Full Name
- Email
- Mobile Number
- Password
- Confirm Password

Employer Registration

Fields

- Company Name
 - Contact Person
 - Email
 - Mobile Number
 - Password
 - Confirm Password
-

Login

- Email Login
 - Password Login
-

Password Features

- Change Password
 - Forgot Password
 - Reset Password
-

Security

- Password Hashing (password_hash())
 - Login Attempt Limiting
 - Account Lock After Multiple Failed Attempts
 - Session Timeout
 - Remember Me Functionality
-

Module 2: Candidate Profile Management

Candidate Dashboard

Candidate can manage:

Personal Information

- Name
- Email
- Mobile
- Address
- Profile Picture

Professional Details

- Skills
 - Experience
 - Education
 - Certifications
-

Resume Management

Candidate can:

- Upload Resume
- Update Resume
- Download Resume

Supported Files:

- PDF
 - DOC
 - DOCX
-

Profile Completion Meter

Example:

- Personal Information = 25%
- Education = 25%
- Experience = 25%
- Resume Uploaded = 25%

Total Profile Completion = 100%

Module 3: Employer Management

Employer Dashboard

Company Profile

- Company Name
 - Company Logo
 - Website
 - Industry
 - Company Description
 - Company Address
-

Company Verification

Admin approval required before posting jobs.

Recruiter Management

Employer can:

- Add Recruiters
 - Edit Recruiters
 - Delete Recruiters
-

Module 4: Job Posting Management

Create Job

Fields

- Job Title
- Job Description
- Required Skills
- Experience Required
- Salary Range

- Job Type
 - Location
 - Number of Openings
 - Application Deadline
-

Job Types

- Full Time
 - Part Time
 - Contract
 - Internship
 - Remote
-

Job Status

- Draft
 - Published
 - Closed
 - Expired
-

Module 5: Job Search Engine

Search Filters

- Keyword
 - Location
 - Skill
 - Salary
 - Experience
 - Job Type
 - Remote Jobs
-

Sorting

- Latest Jobs
 - Highest Salary
 - Relevance
-

Pagination

- Pagination
 - Load More
-

Module 6: Job Application System

Apply for Job

Candidate can:

- Upload Resume
 - Add Cover Letter
 - Submit Application
-

Application Status

- Applied
 - Under Review
 - Shortlisted
 - Interview Scheduled
 - Selected
 - Rejected
-

Duplicate Prevention

One candidate cannot apply to the same job multiple times.

Unique Constraint:

```
UNIQUE(candidate_id, job_id)
```

Module 7: Employer Applicant Management

Applicant List

Employer can:

- View Applicants
 - Download Resume
 - Filter Applicants
-

Filters

- Skills
 - Experience
 - Education
 - Status
-

Actions

- Shortlist Candidate
 - Reject Candidate
 - Schedule Interview
-

Module 8: Interview Management

Schedule Interview

Fields

- Candidate
 - Job
 - Interview Date
 - Interview Time
 - Meeting Link
-

Interview Status

- Scheduled
 - Completed
 - Cancelled
-

Module 9: Saved Jobs

Candidate can:

- Save Job
 - Remove Saved Job
 - View Saved Jobs
-

Module 10: Job Alerts

Candidate can create alerts for:

- PHP Jobs
 - Laravel Jobs
 - Node.js Jobs
 - Remote Jobs
-

Alert Frequency

- Daily
 - Weekly
-

Module 11: Notification System

Candidate Notifications

- Application Submitted
 - Interview Scheduled
 - Job Closed
-

Employer Notifications

- New Application Received
 - Interview Response
-

Notification Types

- Unread

- Read
-

Module 12: Admin Panel

Dashboard Statistics

- Total Users
 - Total Employers
 - Total Candidates
 - Total Jobs
 - Total Applications
 - Total Interviews
-

User Management

Admin can:

- View Users
 - Block Users
 - Activate Users
 - Delete Users
-

Employer Verification

Admin can:

- Approve Company
 - Reject Company
-

Job Moderation

Admin can:

- Approve Jobs
 - Reject Jobs
 - Remove Spam Jobs
-

Module 13: Reports & Analytics

Admin Reports

- Jobs Posted
 - Applications Received
 - Active Users
 - Companies Registered
-

Employer Reports

- Total Jobs Posted
 - Total Applications
 - Job Performance
-

Candidate Reports

- Applied Jobs
 - Interview History
 - Saved Jobs
-

Module 14: System Messages

Candidate Messages

- Registration Successful
 - Password Reset Successful
 - Application Submitted
 - Interview Scheduled
-

Employer Messages

- Company Approved
 - New Applicant Received
-

Module 15: Production-Level Security

Security Features

Authentication

- Session Authentication
- Secure Cookies

Password Security

- `password_hash()`
- `password_verify()`

Database Security

- PDO Prepared Statements

Input Validation

- Server-side Validation
- Client-side Validation

XSS Protection

```
htmlspecialchars()
```

CSRF Protection

```
$_SESSION['csrf_token']
```

Session Security

- Session Regeneration
- Session Timeout
- Secure Cookie Flag
- HttpOnly Cookies

Upload Security

- MIME Type Validation
- File Size Validation
- Unique File Names

Rate Limiting

- Prevent Brute Force Login Attacks

Database Tables

users

```
users
(
id,
role,
name,
email,
mobile,
password,
status,
created_at,
updated_at
)
```

companies

```
companies
(
id,
employer_id,
company_name,
website,
industry,
description,
logo,
status,
created_at,
updated_at
)
```

jobs

```
jobs
(
id,
employer_id,
title,
description,
skills,
experience,
salary_min,
salary_max,
job_type,
location,
openings,
```

```
deadline,  
status,  
created_at,  
updated_at  
)
```

applications

```
applications  
(  
  id,  
  candidate_id,  
  job_id,  
  resume,  
  cover_letter,  
  status,  
  created_at  
)
```

interviews

```
interviews  
(  
  id,  
  application_id,  
  interview_date,  
  interview_time,  
  meeting_link,  
  status,  
  created_at  
)
```

saved_jobs

```
saved_jobs  
(  
  id,  
  candidate_id,  
  job_id,  
  created_at  
)
```

notifications

```
notifications  
(  
  id,  
  user_id,  
  message,  
  is_read,
```

```
created_at
)
```

password_resets

```
password_resets
(
id,
email,
token,
expired_at
)
```
