

# MySQL Assignment Questions (100 Problems)

**Topics: SELECT, INSERT, UPDATE, DELETE, WHERE, ORDER BY, GROUP BY, HAVING, JOIN, ALTER, FOREIGN KEY, TRUNCATE**

Assume the following tables:

- categories
  - subcategories
  - products
  - customers
  - orders
  - order\_items
  - employees
  - departments
- 

## SELECT (1-15)

1.

Display all products.

2.

Display all active products.

3.

Display product name and price only.

4.

Display all customers.

5.

Display all employees.

6.

Display distinct categories.

**7.**

Display products whose price is greater than 1000.

**8.**

Display products whose stock is less than 10.

**9.**

Display the first 10 products.

**10.**

Display the last 5 inserted products.

**11.**

Display all products with alias names.

**12.**

Display products created today.

**13.**

Display products between ₹500 and ₹1000.

**14.**

Display products having NULL description.

**15.**

Display products whose name starts with "S".

---

## **INSERT (16-25)**

**16.**

Insert one category.

**17.**

Insert five products.

**18.**

Insert one customer.

**19.**

Insert one employee.

**20.**

Insert multiple departments.

**21.**

Insert one order.

**22.**

Insert multiple order items.

**23.**

Insert a product with NULL description.

**24.**

Insert products from another table.

**25.**

Insert records using SELECT query.

---

## **UPDATE (26-35)**

**26.**

Update product price.

**27.**

Update stock quantity.

**28.**

Update category name.

**29.**

Update all inactive products to active.

**30.**

Increase product prices by 10%.

**31.**

Update customer mobile number.

**32.**

Update employee salary.

**33.**

Update all products of one category.

**34.**

Update order status.

**35.**

Update multiple columns in one query.

---

## **DELETE (36-45)**

**36.**

Delete one product.

**37.**

Delete all inactive products.

**38.**

Delete one customer.

**39.**

Delete all orders older than one year.

**40.**

Delete products having zero stock.

**41.**

Delete duplicate products.

**42.**

Delete one department.

**43.**

Delete products by category.

**44.**

Delete order items of a particular order.

**45.**

Delete all records from temporary table.

---

## **WHERE Clause (46-55)**

**46.**

Find products whose price is greater than 500.

**47.**

Find products whose stock is between 10 and 50.

**48.**

Find products in category ID 3.

**49.**

Find employees whose salary is greater than 50,000.

**50.**

Find customers from Kolkata.

**51.**

Find products with names ending with "Phone".

**52.**

Find products with names containing "Samsung".

**53.**

Find products with NULL image.

**54.**

Find products whose price is not equal to 1000.

**55.**

Find orders placed this month.

---

## **ORDER BY (56-60)**

**56.**

Sort products by price ascending.

**57.**

Sort products by price descending.

**58.**

Sort customers by name.

**59.**

Sort employees by joining date.

**60.**

Sort products by category and price.

---

## GROUP BY (61-70)

**61.**

Count total products in each category.

**62.**

Find average product price per category.

**63.**

Find total stock per category.

**64.**

Find maximum salary department-wise.

**65.**

Find minimum salary department-wise.

**66.**

Count total employees department-wise.

**67.**

Find total orders customer-wise.

**68.**

Find total sales product-wise.

**69.**

Find average order amount customer-wise.

**70.**

Find total products subcategory-wise.

---

## HAVING (71-75)

**71.**

Display categories having more than 10 products.

**72.**

Display customers having more than 5 orders.

**73.**

Display departments having more than 20 employees.

**74.**

Display products whose total sales exceed ₹1,00,000.

**75.**

Display categories whose average price is greater than ₹5000.

---

## **JOIN (76-90)**

**76.**

Display products with category names.

**77.**

Display products with category and subcategory names.

**78.**

Display customers with their orders.

**79.**

Display orders with order items.

**80.**

Display employees with department names.

**81.**

Display all products even if category does not exist.

**82.**

Display all categories even if no products exist.

**83.**

Display customer name, order number and total amount.

**84.**

Display product name and total quantity sold.

**85.**

Display category-wise total sales.

**86.**

Display top 5 customers by purchase amount.

**87.**

Display products that have never been ordered.

**88.**

Display customers who never placed orders.

**89.**

Display departments without employees.

**90.**

Display employees earning more than the department average salary.

---

## **ALTER TABLE (91-95)**

**91.**

Add `image` column to products table.

**92.**

Add `status` column to categories table.

**93.**

Modify product price datatype.

**94.**

Rename `mobile` column to `phone`.

**95.**

Drop `description` column from products table.

---

## FOREIGN KEY (96-98)

**96.**

Create a foreign key between products and categories.

**97.**

Create a foreign key between orders and customers.

**98.**

Create a foreign key between `order_items` and orders.

---

## TRUNCATE (99-100)

**99.**

Truncate `temporary_products` table.

**100.**

Truncate `logs` table and reset auto increment.
